MICRO ENTERPRISE PROJECT – CASE STUDIES	
Study 16	
	<u>Bio Data</u> Name: Mrs. S. Radha Age: 28 Status: Married with two children. Background: Studied upto 8 th Std. MEP: Compressor Unit
<p>NOTE: Mrs Radha is a poor woman born in Maruthangudi village. Her husband is a Car painter, however they were really struggling as his wage was not enough to support the family. She approached the Ford Trust for financial assistance to buy a Compressor Unit to paint the cars so that they could earn a decent wage.</p> <p>We assisted with a sum of INR. 5000 for purchasing a second hand compressor as a new one was too costly.</p> <p>Unfortunately the family has now migrated to Karaikudi and the unit was not started even after one year. When she was contacted, she said that they had purchased the materials, but had been advised by a fortune teller that if the business was started it would not succeed and so they have postponed the launch.</p>
